

## THE YOUNGERS NASHVILLE AGAIN

*Nashville Again*, the new album from The Youngers, is sparking reinforcement of how styles and genres rooted in the past are constantly being reinvented into something new. The record's 10 songs might best be described as Garage-Americana, building on a RootsRock base and encompassing everything from garage rock to classic truck driving music to surf. While each song travels a different road, they all come together to create a musical superhighway where everything flows together seamlessly. "This band is a melting pot of so many different influences, so you can't help but see that reflected in our songs," says singer/guitarist Todd Notobartolo. "I've been really inspired by records like *Sweetheart Of The Rodeo*, and by bands like Neil Young & Crazy Horse, The Band and The Sadies. You pick up the crumbs along the trail and, after a while, that stuff sinks into your bones. Once it's inside you, it's bound to work its way back to the surface eventually, and this album reflects that. I think it shows every aspect of what we're capable of, and that's what makes it interesting. I like to not hear the same thing on every song on an album, for me, having real variety is a lot more pleasing. That's one of the reasons why this record has instrumentals, those songs are as powerful as the ones with lyrics; the more colors you can add in to the painting, the more depth you add to the landscape." With an approach that could arguably be called 'sturm und twang,' The Youngers riff on guitar-driven roots music makes *Nashville Again* an audio tourist destination worth visiting again and again.

**RIYL: My Morning Jacket, Sun kil Moon, Uncle Tupelo**  
**FOCUS TRACKS: Cat Eyes, Highway Blues, Willie McCoy**

**ALL SONGS FCC CLEAN FOR AIRPLAY**

### TRACK LISTING
